# Value of Time

DURING  
SUMMER  
BREAK

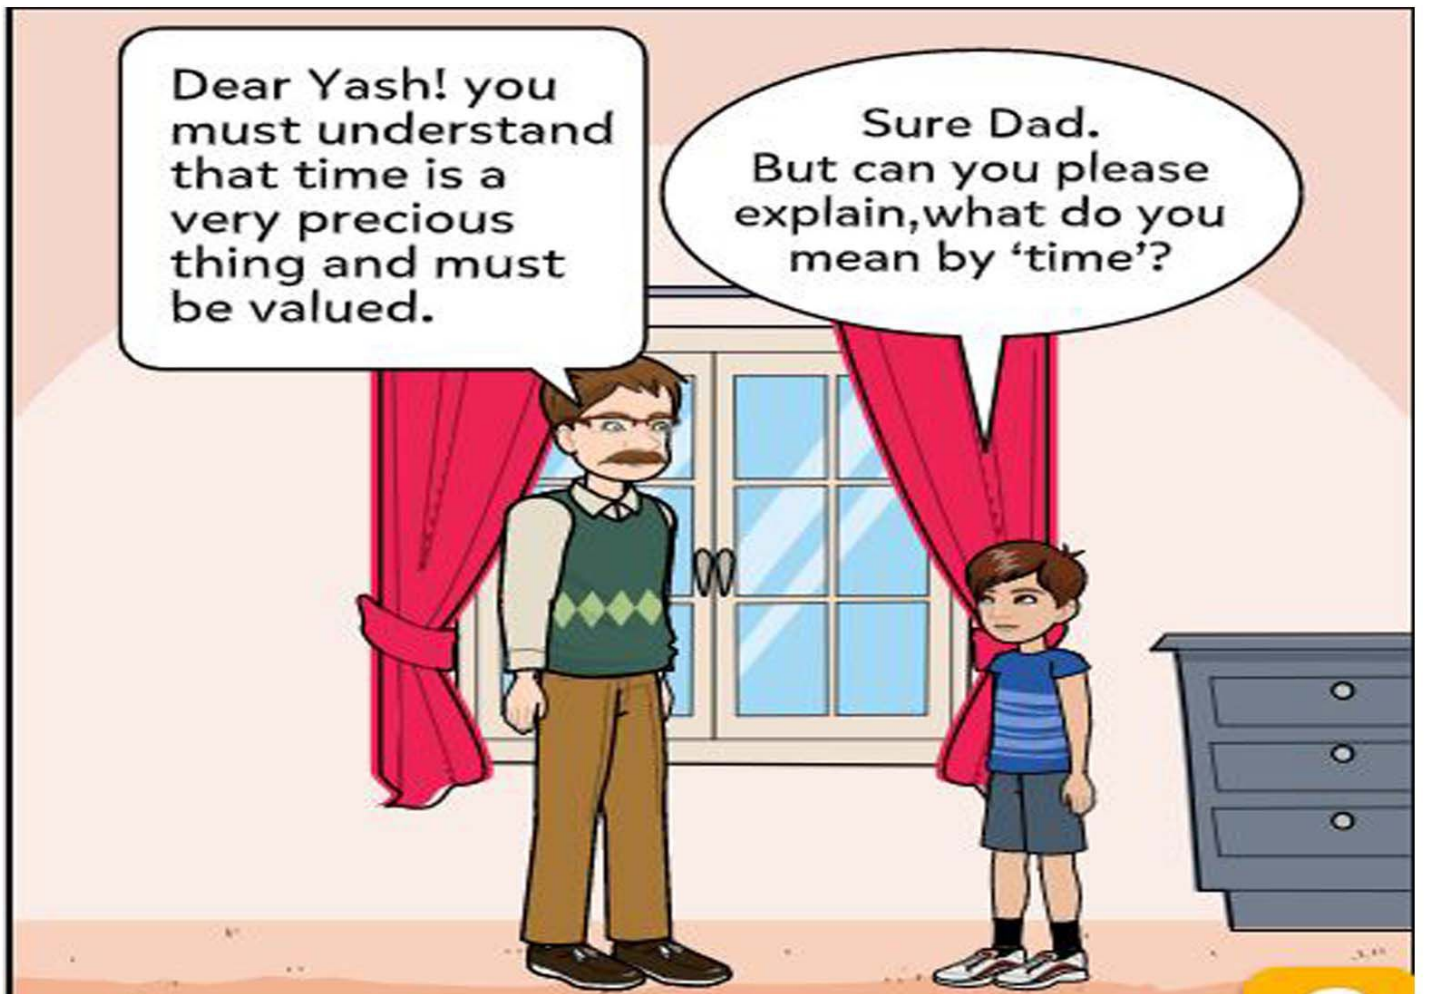

Goodmorning  
dad!

Goodmorning  
Yash! Come with  
me to the living  
room.

Dear Yash! you  
must understand  
that time is a  
very precious  
thing and must  
be valued.

Sure Dad.  
But can you please  
explain, what do you  
mean by 'time'?

Can you see the clock on the wall over there? That tells us the time everyday round the year.

Oh!  
I see.

Value time!! I think if I clean the clock with a cloth, I will appreciate the value of time.

AFTER A  
WEEK

My Dear  
son! Are you now  
able to appreciate the  
value of time?

Ofcourse  
yes,dad! I am  
taking a good  
care of it.

Ok. Can  
you let me know  
how you are able  
to do it?

Dad, I am wiping  
the clock well  
with a soft  
cloth.Have a look  
at how shiny it is!

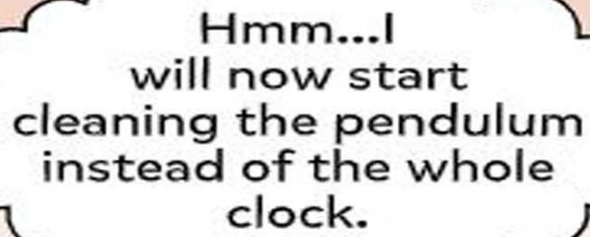

The clock is a simple machine and pendulum is its important part. Let me try to repair it and it should start working like before.

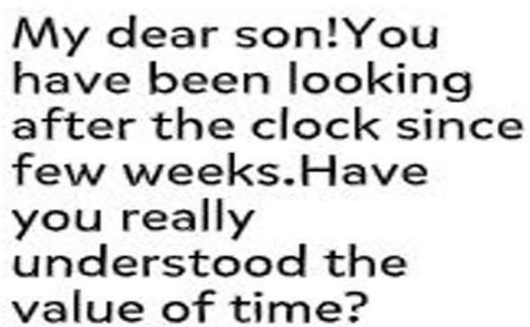

Now I understand that the pendulum is the most important part and not the entire clock.

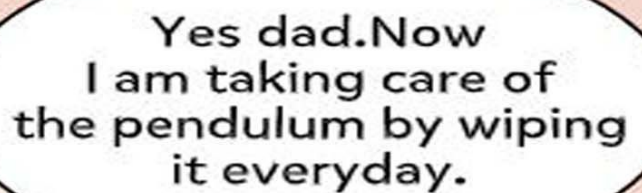

Hmm...I  
will now start  
cleaning the pendulum  
instead of the whole  
clock.

AFTER 2 WEEKS.....

My dear son! You  
have been looking  
after the clock since  
few weeks. Have  
you really  
understood the  
value of time?

Yes dad. Now  
I am taking care of  
the pendulum by wiping  
it everyday.

Oh my dear! Cleaning the pendulum/clock is not the same as giving value to time. Infact if you see, the pendulum is bent with everyday cleaning.

Then please explain it to me dad. How do I value time?

Let me explain the meaning of time. The clock works only if the pendulum moves. The gap or the interval between the first and second movement is called Time

If the gap between two movements is time, how do I value it dad?

Good question, Yash! The best way to appreciate the value of time is to be involved in your work so much that you do not notice the movement of pendulum at all. In other words, you make full use of your time by using it correctly and with good intentions.

I now understood it well dad! If I make sure that I am doing something useful and helpful with some good intentions, that is how time is valued, am I right?

Yes  
dear! You  
grasped it well.  
Well done, Yash!

# SUMMARY

**Every machine is made for fulfilling a purpose. Clocks are machines made to realize the value of time. Similarly, Ra-dha-sva-aa-mi Dayal has created super machines known as human beings. In the human body, HE has fixed an important part known as brain similar to a pendulum in clocks. Brain does not swing from left to right like a pendulum but can distinguish between what is right and what is wrong (Conscience). So every person should utilize their time in doing the right things and focus on real value of time as in the story (Atmabal). Correlating the above story with the Satsang world, our Sant Satguru is a rare precious jewel ever seen and should be valued heartily. Every Satsangi values him by bowing heads, offering bhents, distributing prashad and performing Sumiran, Dhyan and Bhajan but a true Satsangi values Satsang culture with all his heart. If the effect of all these activities is positive and the love for Sant Satguru increases day by day then realize that you are on the right path with right intentions otherwise you have wasted your time till now.**
